The 1964 *Tomcat*

Published By The Annual Staff
OF
GASTON TECHNICAL INSTITUTE
GASTONIA, NORTH CAROLINA

Be careful, don't break that cutter.

Mechanical And Production Engineering Technology

The Mechanical and Production Engineering Technology curriculum is intended to train students in production processes, equipment, sales, supervision of personnel, tooling, drafting, and production of material goods. This versatile training enables him to assist the engineer or the small manufacturer in all types of industry.

During a student's senior year he may have as many as fifteen interviews, which are arranged by the institute's excellent placement service. Out of these interviews many students are given approximately five job offers in a variety of vocations from which he may choose the one that best fulfills his ambitions.

$$2 + 2 = 4 ?$$

OOOOOOO-h, what I see!

The main purpose of the Civil Engineering Technology curriculum is to educate the student in practical applications within the broad field of Civil Engineering. This program is intended to prepare the student for vocations in the construction and transportation fields of engineering. Graduates are qualified to do estimating, specification writing, surveying, inspection, or supervising.

Students are also offered training in methods and equipment used in heavy engineering construction.

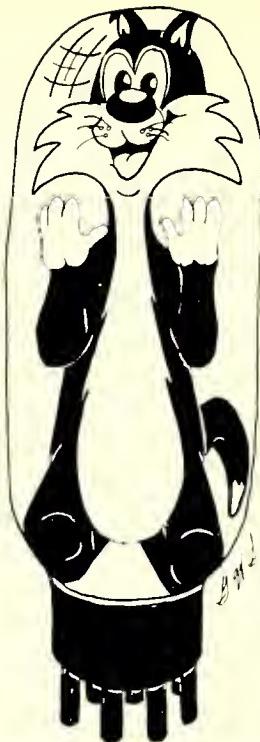

Civil Engineering Technology

Be sure that partition is plumb.

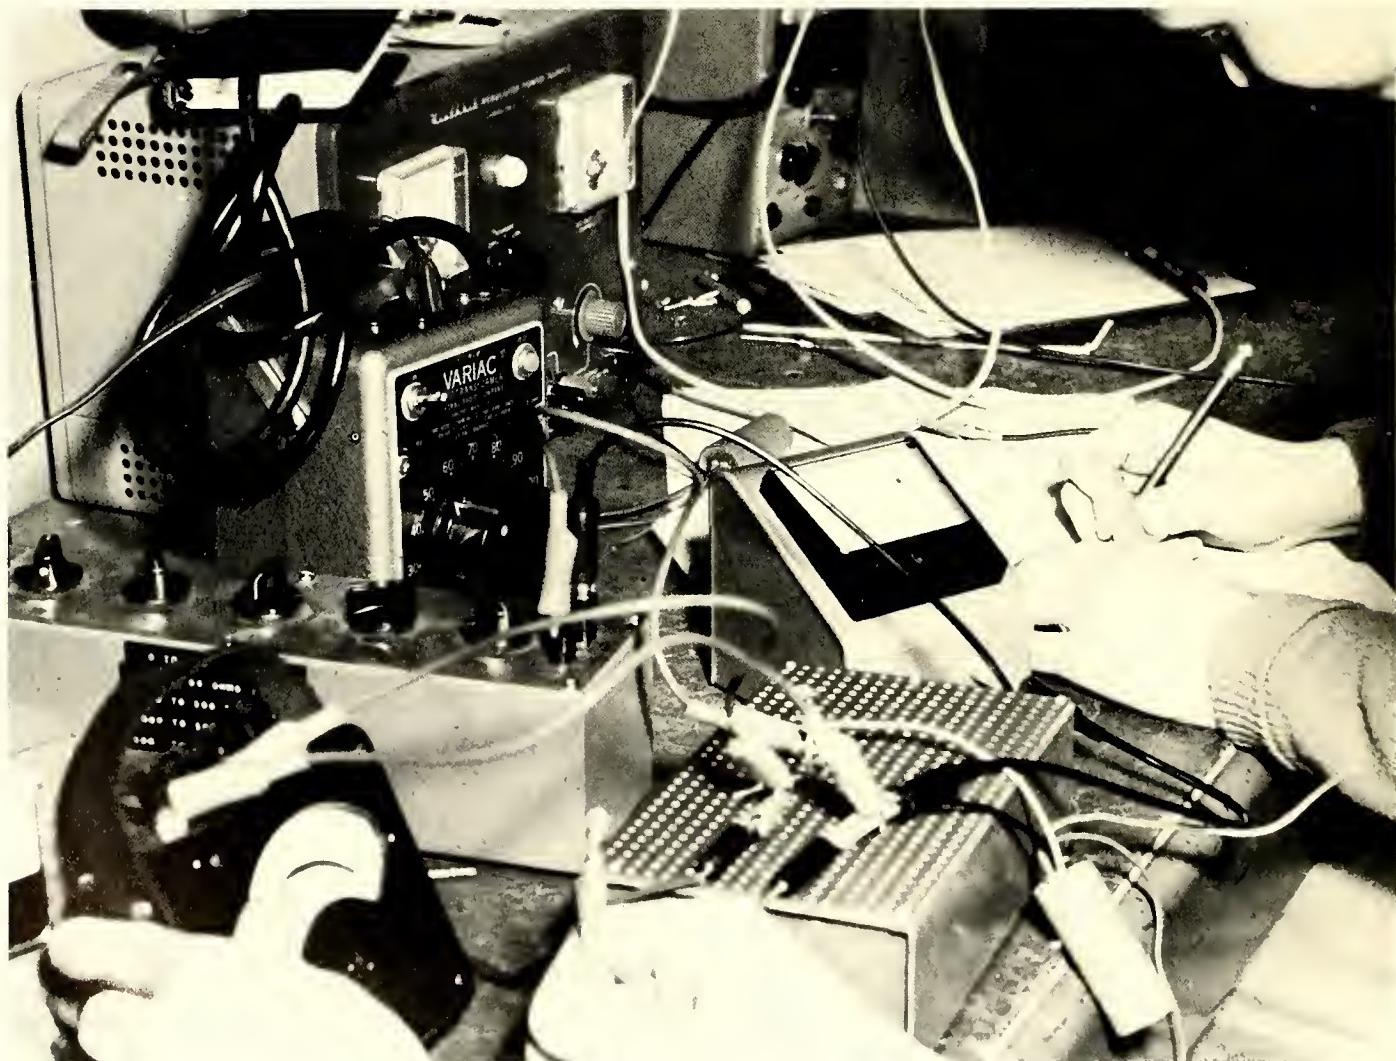

In Electronics Engineering Technology the student gains a thorough background in the basic studies and sciences, as well as the essential specialized courses in electronics. Through the use of both laboratory equipment and class instruction, he acquires knowledge in the broad area of electronics.

Employment is offered in manufacturing, production, sale of electronic equipment, testing, inspection, and promotion. Great opportunities are also found in building, installation, and maintenance of electronic devices essential to industry.

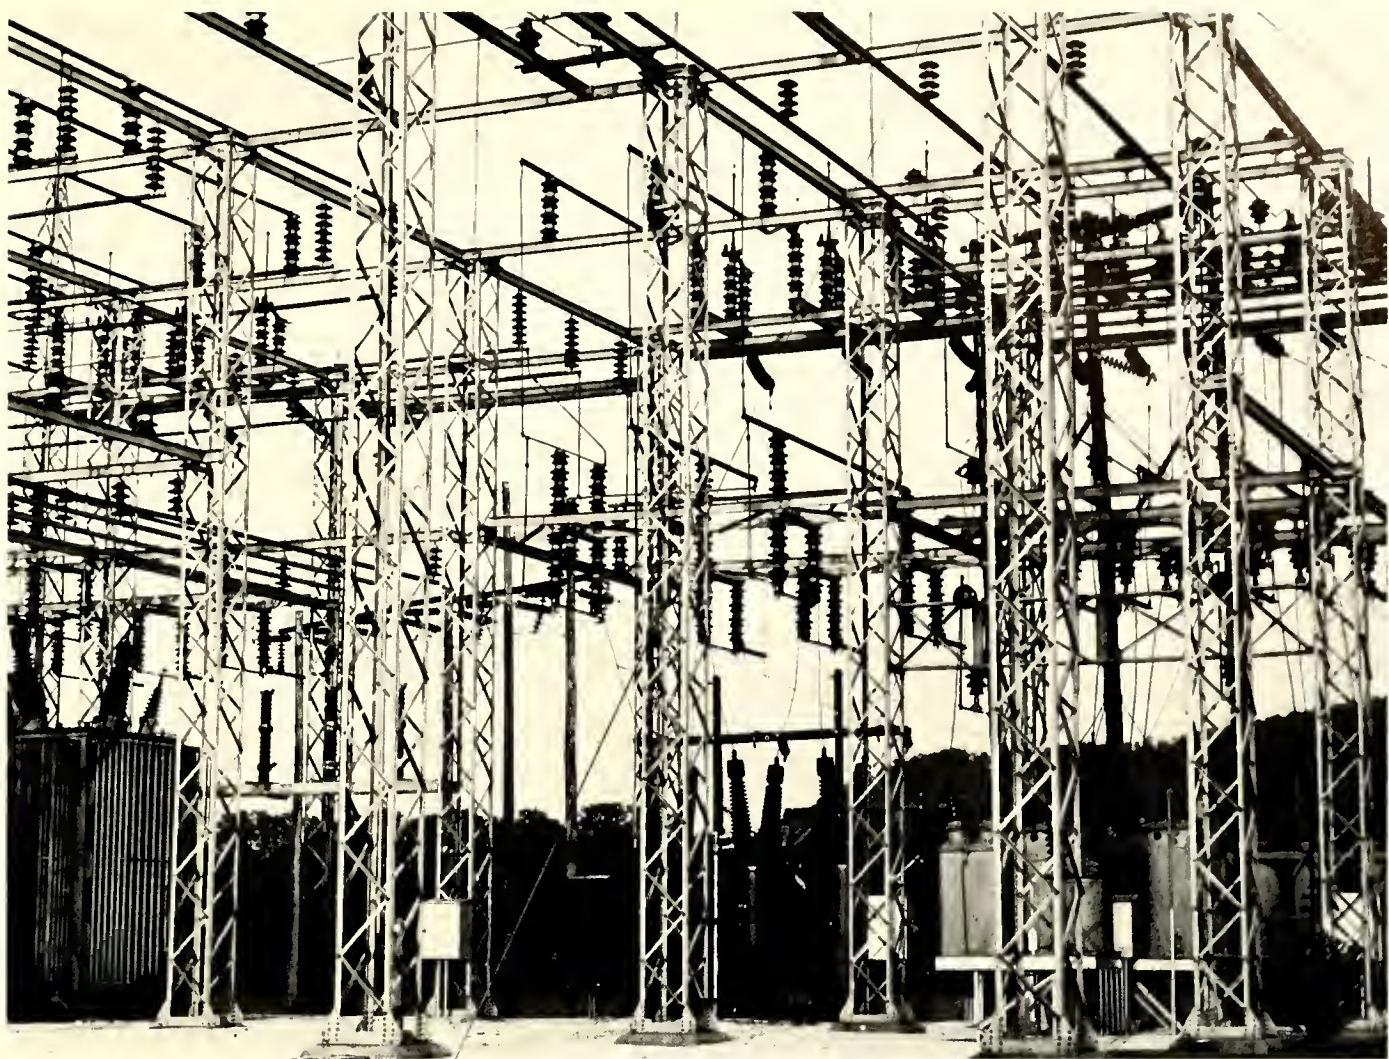

I picked this trick up in Mr. White's tube class!

Electronics Engineering Technology

Oops!! Don't cross those wires.

Without this we would be back in the dark ages.

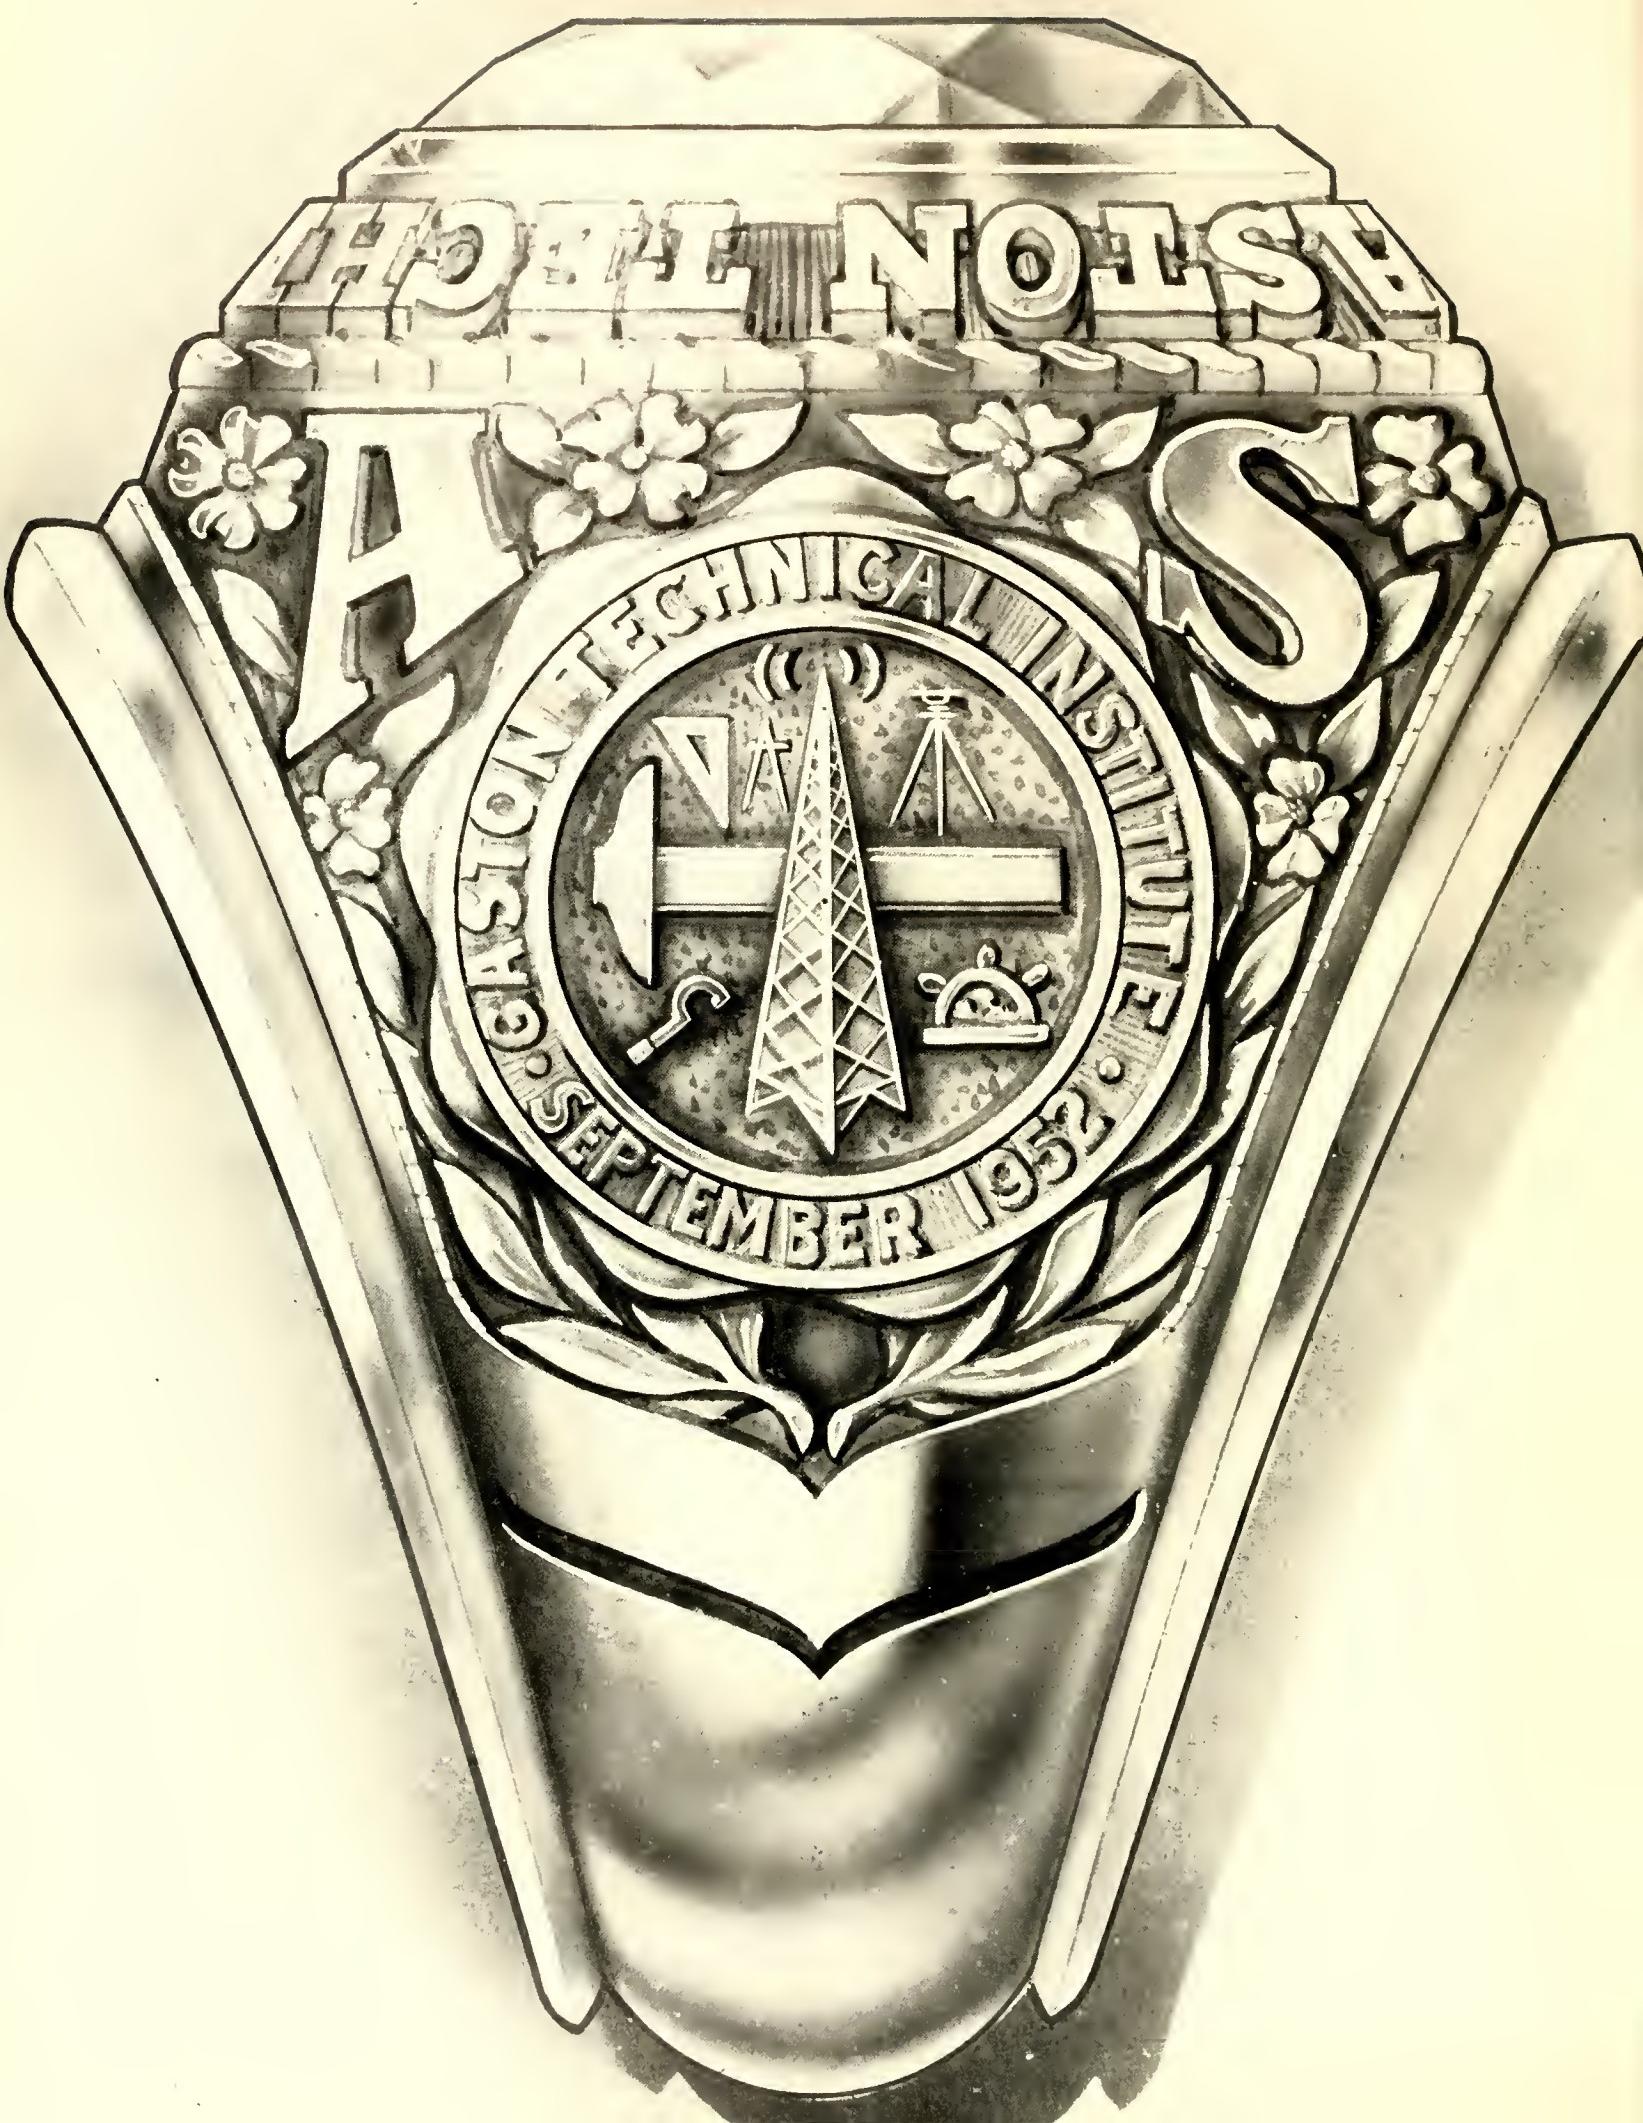

Electrical Engineering Technology

The Program of Electrical Engineering Technology enables students to fill the position between the electrician and the electrical engineer. Education in commercial, residential, and industrial fields is offered on as wide a basis as possible.

After graduation students are qualified to obtain a large variety of jobs, such as sales, drafting, supervision of installations, electrical contracting, maintenance of power plants and other electrical equipment. Industry also offers positions for electrical graduates as manufacturing and production technicians.

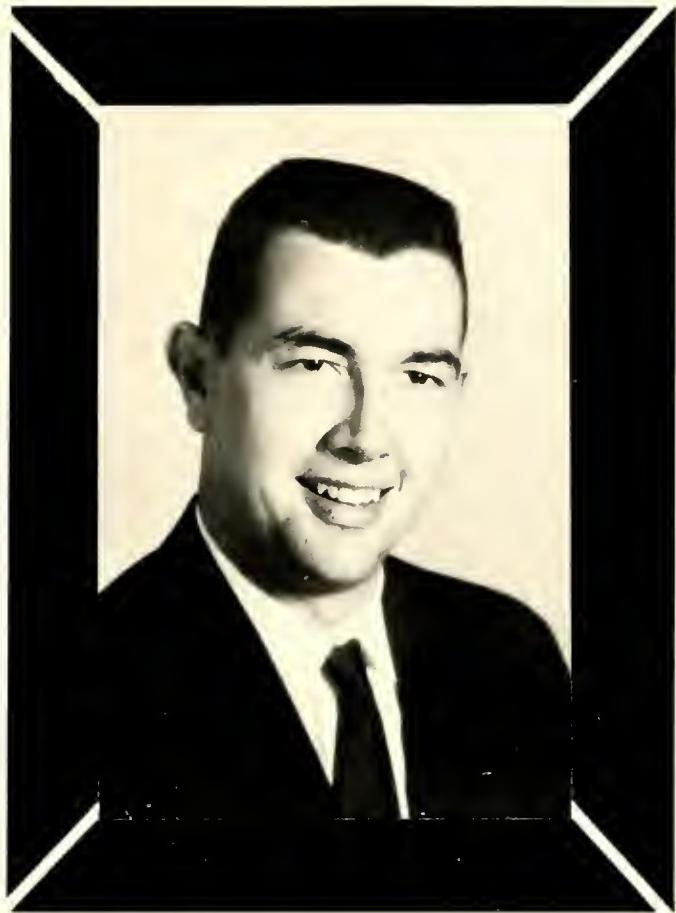

He ----- lp, Pap ----- py!

WE DEDICATE

This, The '64 Edition of The Tom Cat
to

Paul Vincent Smith

for his earnest and devoted effort on behalf of the students and faculty.

As one student aptly said, "It was Mr. Smith who first told me about G.T.I.; it was Mr. Smith who greeted me when I entered; and it was he who continued his interest in me until I was graduated."

Registrar was his true Title, but Friend To All his true Goal.

GASTON TECHNICAL INSTITUTE

FOUNDED - 1952

ADMINISTRATION

John T. Caldwell

B.S., M.A., Ph.D

Chancellor

North Carolina State of the University of North Carolina at Raleigh

The Gaston Technical Institute is operated by the College Extension Division of North Carolina State College at Raleigh. The academic program and staff appointments are under the control and supervision of The School of Engineering.

The Gaston Technical Institute offers four curricula in engineering technology, each of which is accredited by the Engineers' Council for Professional Development.

At G.T.I. new ideas are received, some conflicting with old standards, some upholding previous knowledge. No longer is our mental world bound by the small area of our home environment, but we encounter new ideas to stimulate new growth and expansion. Our academic world is involved in a new era of maturation through contact with intellectual stimulus.

A college education should involve four elements—
Development of moral integrity;
A liberal education to give a richer life,
broader understanding, and to bring citizenship into proper perspective;
Acquisition of technical knowledge for professional leadership;
Development of physical fitness;
G.T.I. tries to provide all four, with interest in students as individuals—not merely as so many minds to educate.

A well-qualified faculty of twenty members devote their time and talents to the student body both in class and in personal conferences, enhancing the academic atmosphere with excellent relationships between the teachers and the students. These people assist the college in planning an academic program which will train the intelligence, strengthen the body, and provide a rich spiritual and social life leading to wholesome personal living.

FACULTY

Because the true leaders of tomorrow will be called upon to supply the morality and ethics for our brave new world of technology, there exists a tremendous responsibility for the preparation of these leaders. This responsibility rests on the shoulders of our administration. We, the students of G.T.I. acknowledge our faith and confidence in our administrators to enable us to be guided by the pulse of the social sciences, the heartbeat of humanities, and the wisdom of religion rather than being hypnotized by the awesome prowess of the physical sciences, and the incantations of digital computers.

The stimulation of events and occasions adds the lively movement, excitement, and vivid "splash" to our campus, which is embroidered by the many phases of the students' environment. All this—of which the leader is a product.

This is not the end — only the beginning.

Education for nothing more than an immediate vocation is a costly waste; for we are a part of all that we have seen, heard, and met—the joys and sorrows, the laughs and disappointments, the meaningful and the depressive—accepting as its fundamental purpose the task of preparing leaders for our exciting tomorrow.

Today's college students . . . tomorrow's world leadership . . . represent the HOPE of a weary and discouraged mankind, desperately in need of the vigorous vitality of young minds in whom the ideal is still real, and expectantly looking to the energetic enthusiasm of youth still flexible and optimistic enough to be capable of new and significantly creative solutions to life's oldest problems.

Any college—old or young, large or small—must have a living personality separate and distinct from all others. This is what makes it worthy of its name. This personality—this individuality—should be rooted in its philosophy and objectives, and revealed through its actions. . .

Gaston Technical Institute represents an idea which is not realized in the brick of its buildings, nor the accumulated wisdom of its library or faculty, but in the minds of the young men who attend Gaston Technical Institute. G.T.I. is the students; the students are G.T.I.—not as they exist one by one, but as they are unified by the idea that is contained within them.

Because the students are the vital life on any campus, we at Gaston Technical Institute are no exception. The years of maturing and preparing for the future have been years filled with many wonderful memories, some to be told, others to be kept close to the heart and secretly remembered. Realizing our goals, we have set out to prepare ourselves as leaders of our school, churches, industries, communities—in all areas of human relations.

AWARDS DAY

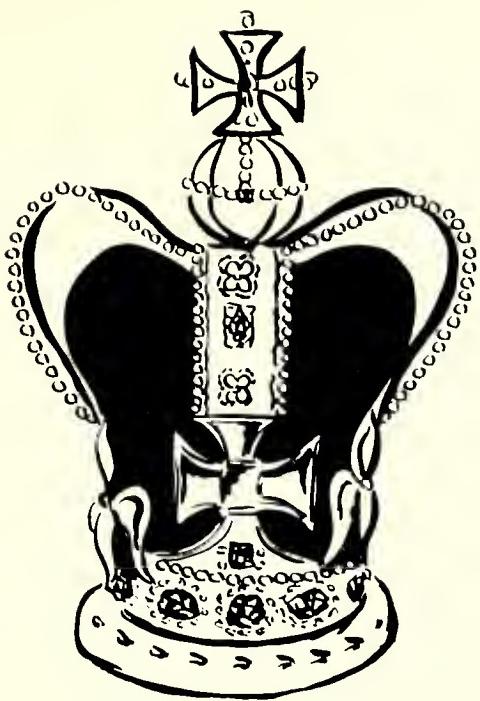

Jerry Bare receives the most coveted
award given at Gaston Tech
**THE CIVITAN GOOD CITIZEN
AWARD**

Keith Dellinger and John Gray, III receive dual awards at the ceremony in May.

Keith was presented the Mathematics Award as well as the Shop Award.

John was presented the English Award and the Physics Award.

CAMPUS KINGS

Danny Leonard holds the awards given as the Best Basketball Player and The Most Competitive Player Award.

Roger Holyfield and Larry Koontz hold the trophy each won as winners of the Electronics Department Champion Football Team.

Roger was selected as Best Player and Larry was selected as Best Manager.

Collegiate Civitan Club

One of the most active campus clubs is the Collegiate Civitan which does much to boost the morale of its members and to be of service to any school endeavor.

The new sign pictured below was erected in the Spring Quarter as a gift from this group. The Annual Fruitcake Sale in the Fall nets good profit for the parent club—the Gastonia Civitan Club.

Some of the other projects of the club have been to sponsor the Thanksgiving Dance at the Agriculture Center and to have supper meetings for the members and prospective members.

STUDENT WIVES CLUB

The Students' Wives Club is one of the most popular clubs on the campus. It is carried on by the college to promote friendship, fellowship, and understanding of common problems. There are monthly meetings, with interesting and informative programs planned for each. Frequently the Faculty wives join in the meetings.

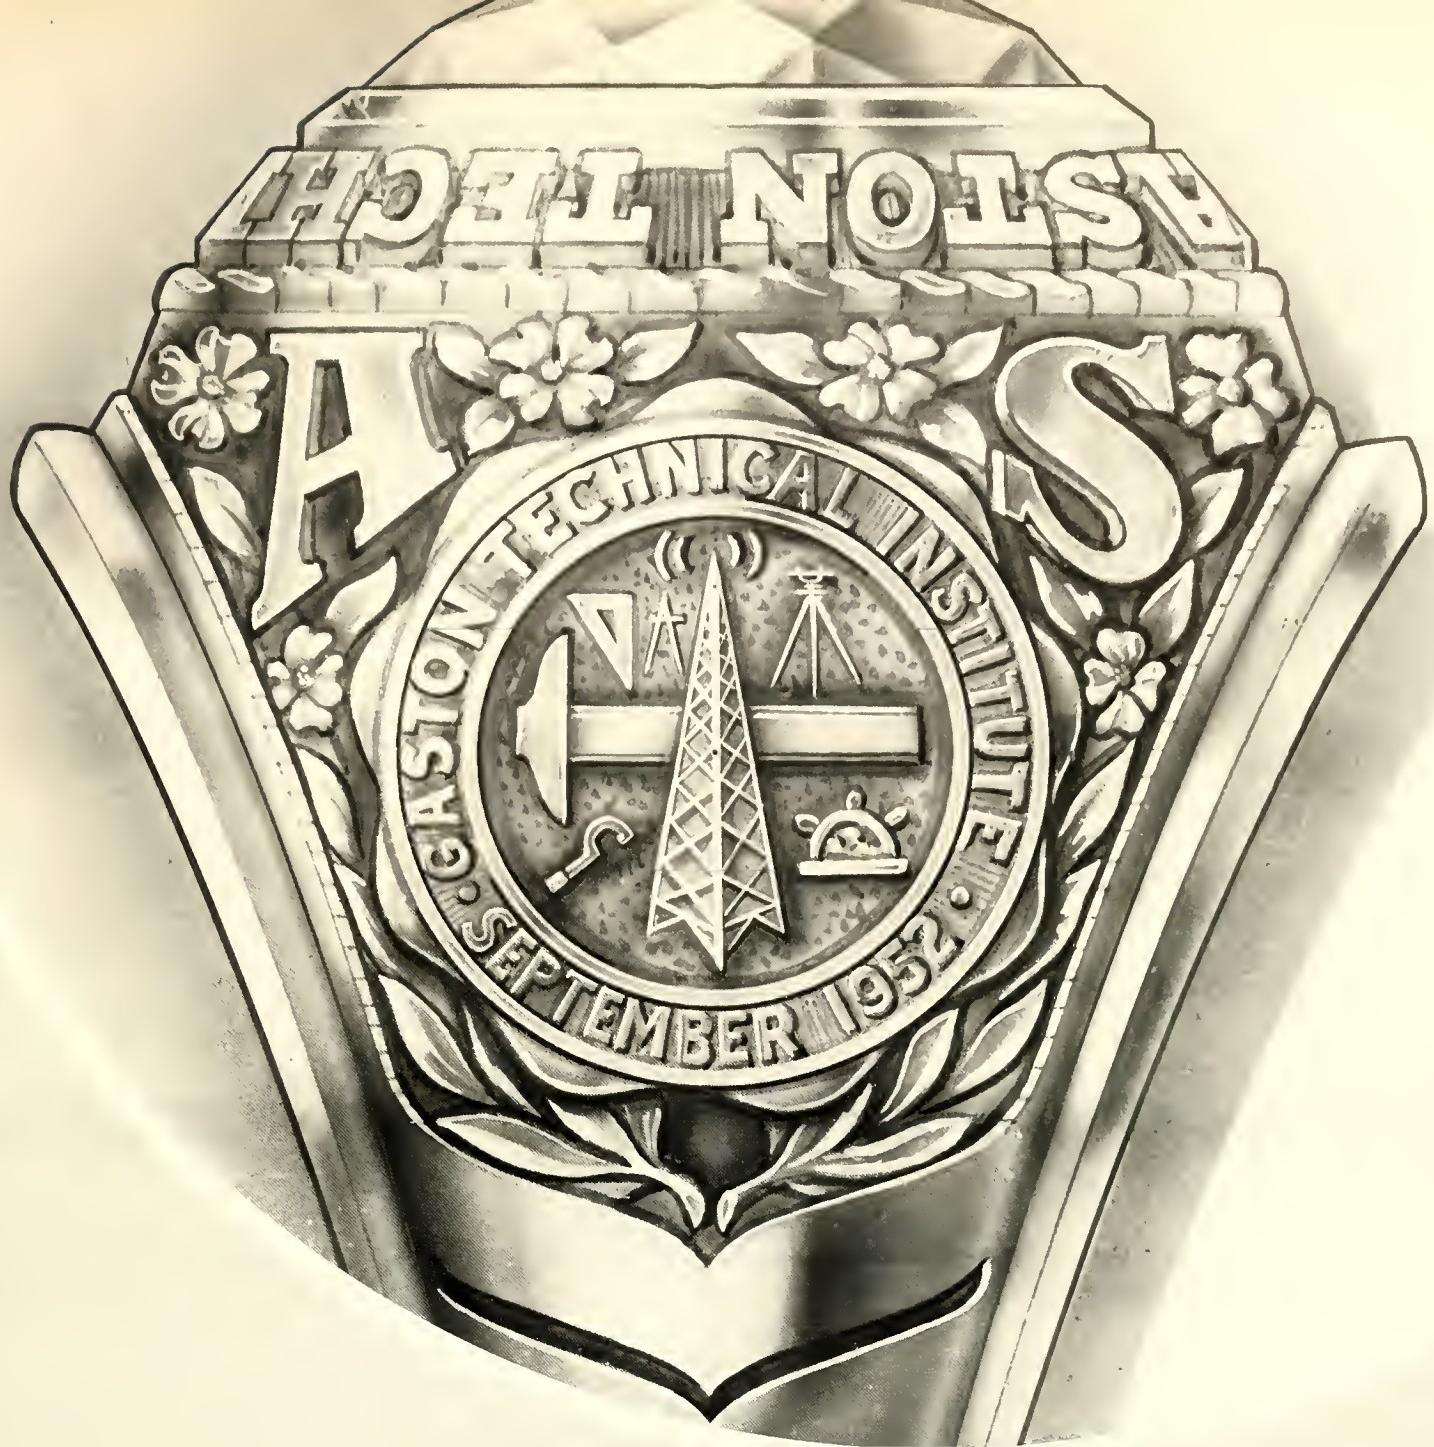

The ladies contribute much to the student organizations by assisting at all social functions and, in most instances, preparing and serving refreshments.

Our well-dressed Pledges

The funniest thing happened to me
on the way here!

Here, let me help you.

VISITORS ON CAMPUS

The four Freshmen were at Gaston Tech. for a program in the winter and the Broody-wine singers came in the spring. The Counts are a local group who play for dances.

It is pleasant to take your best girl out for an evening of entertainment such as these.

The Counts really whoop it up, Go, Go, Go.
Go, Man, Go!

There are frequent visitors to our campus who add much to our well-being. Probably the most welcomed ones are the Interviewers who come to meet the students.

Almost every week in the Autumn and in the Spring sees these gentlemen looking for just the right technician to do a particular job in his company.

Sometimes we have guest of prominence who stop by and speak to the student body.

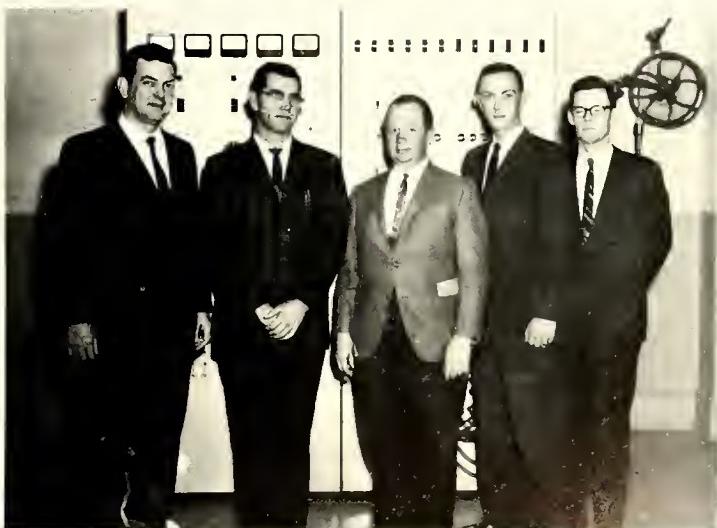

Gentlemen from the Research Triangle interview some of the TOP students at GTI.

Mr. Halstead and Mr. Mason welcome Dr. I. Beverly Lake to the GTI Campus.

Representatives of I.E.E.E. visit our Campus.

RECREATIONAL

How about a cup of Buck's Coffee?

Because of the crowded conditions, the cafeteria and the recreation room serve as student gathering places. The dining room serves three meals each day, but all day long you can find it full of students eating snacks, studying, or just visiting.

Is this really the students' favorite Past-time?

FACILITIES

A serious moment in the Life of the Faculty

Life is full of Ups and Downs

Bank shot in the corner pocket — Three cushions!

ALUMNI DAY

The Alumni hear news of the future
of Gaston Tech . . . They seem rather
serious!

When old friends meet

Strictly business.
